

MODEL 354 UNCASER

The WCC Model 354 Uncaser is a simple, robust machine for use with re-shipper glass bottle packages. The lift-off design uses gripper chain to support the case, deposit the bottles onto the conveyor chain, and then lift the case off of the bottles.

An alternate to hand dumping, the Model 354 Uncaser can increase throughput while eliminating repetitive motion injuries.

Due to its simple design and quality stainless steel construction, the Orton Uncaser is reliable and easy to maintain.

Specifications:

Case Width	6" to 13"
Case Length	9" to 18"
Case Height	6 1/2" to 14"
Max Flap Length	7 1/4"
Bottle Material	Glass

Throughput:

Model	Case Length	Max. Throughput
354-LS	9"	30 CPM
	12"	20 CPM
354-HS	9"	40 CPM
	12"	30 CPM
